

Synchronous Development

We provide lesson plans and curriculum resources to support pre- and post-event engagement, we are always learning in partnership with participating students and educators, who inspire us by inventing new ways to deepen learning and extend their work beyond what we'd imagined.

Competency Focused

Through online collaboration between schools before and after each Global Encounters event, students have opportunities to apply skills and knowledge across subjects to understand and address local and global challenges that they uncover through their participation.

Digital Delivery

The entire Global Encounters program and supporting resources are delivered digitally, with virtual classrooms and many resources are available in both English and French.

Opportunities for Local Decision-Making

Our Global Encounters programming provides an ideal opportunity for educators and students to collaborate on developing local projects as an extension for the time-based virtual connection. TakingITGlobal's resource offers more than 100 opportunities to align local actions and activities.

Professional Development e-Courses

We have a variety of professional development offerings customized to meet the needs of each educators needs. Our accredited online courses support educators in the development of projects that connect with their curriculum objectives and support the values of global citizenship, environmental stewardship, and student voice.

Synchronous development learning in partnership with students and educators

Less content focused, more competency focused

Less print-based curriculum, more digital delivery

Opportunities for Local Decision-Making

Professional development e-courses for educators
